

INTEGRATED FLOOR SYSTEMS

EPOXY COLOR ON COLOR FLOOR SYSTEM

Our color on color system is designed for the customer that demands something better than just a 'concrete floor'. This system uses two component products that are miles above what you would find at the local big box store. This system is a high build system that self-levels on the floor creating a smooth, durable floor finish. A solid color seamless floor from Integrated Floor Systems provides owners and facility personal with a chemical resistant durable floor that is easy to clean.
