

INTEGRATED FLOOR SYSTEMS

EPOXY METALLIC FLOOR SYSTEM

Our metallic epoxy system is the latest trend in floor coatings. This flooring system uses a metallic pigment mixed in an epoxy binder to create very unique 3 dimensional flooring effects. Don't be fooled by the good looks of this system, the same epoxy binder used in harsh environments is the one used in the metallic system to ensure a durable flooring system. When finished with our clear polyurea topcoat, this system can be utilized in most any environment. Our metallic epoxy system combines aesthetics and durability as well as being budget friendly.
