

# INTEGRATED FLOOR SYSTEMS FLOOR COATING SYSTEMS

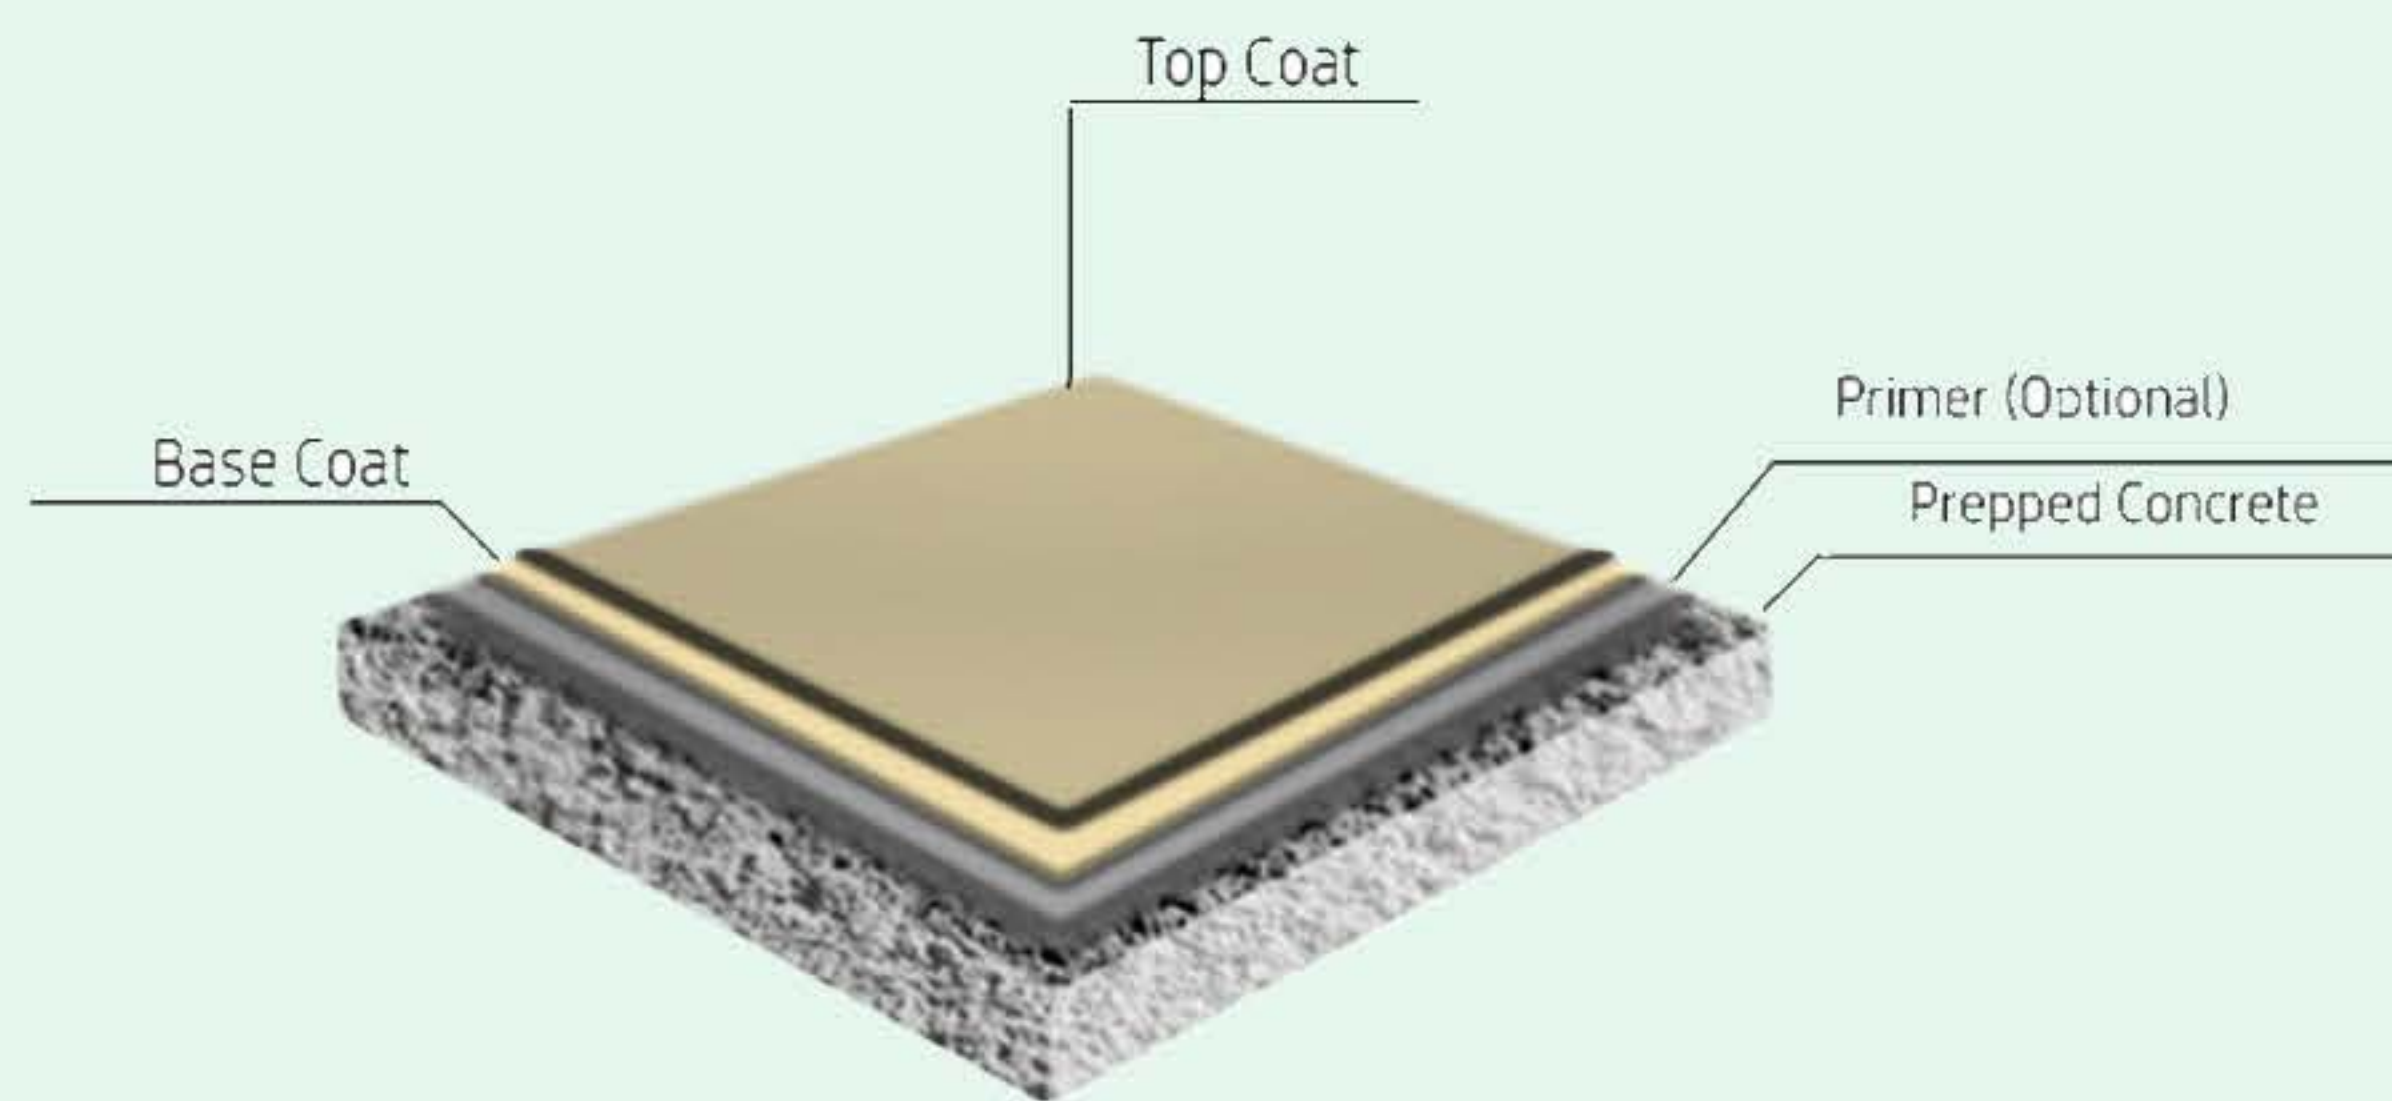

This system is available in a multitude of color combinations. Providing a safe, anti slip surface over concrete floors. This epoxy flake system is the go to choice for many architects and owners looking for a durable, easy to clean and yet economical flooring choice.

## FLAKE COATING

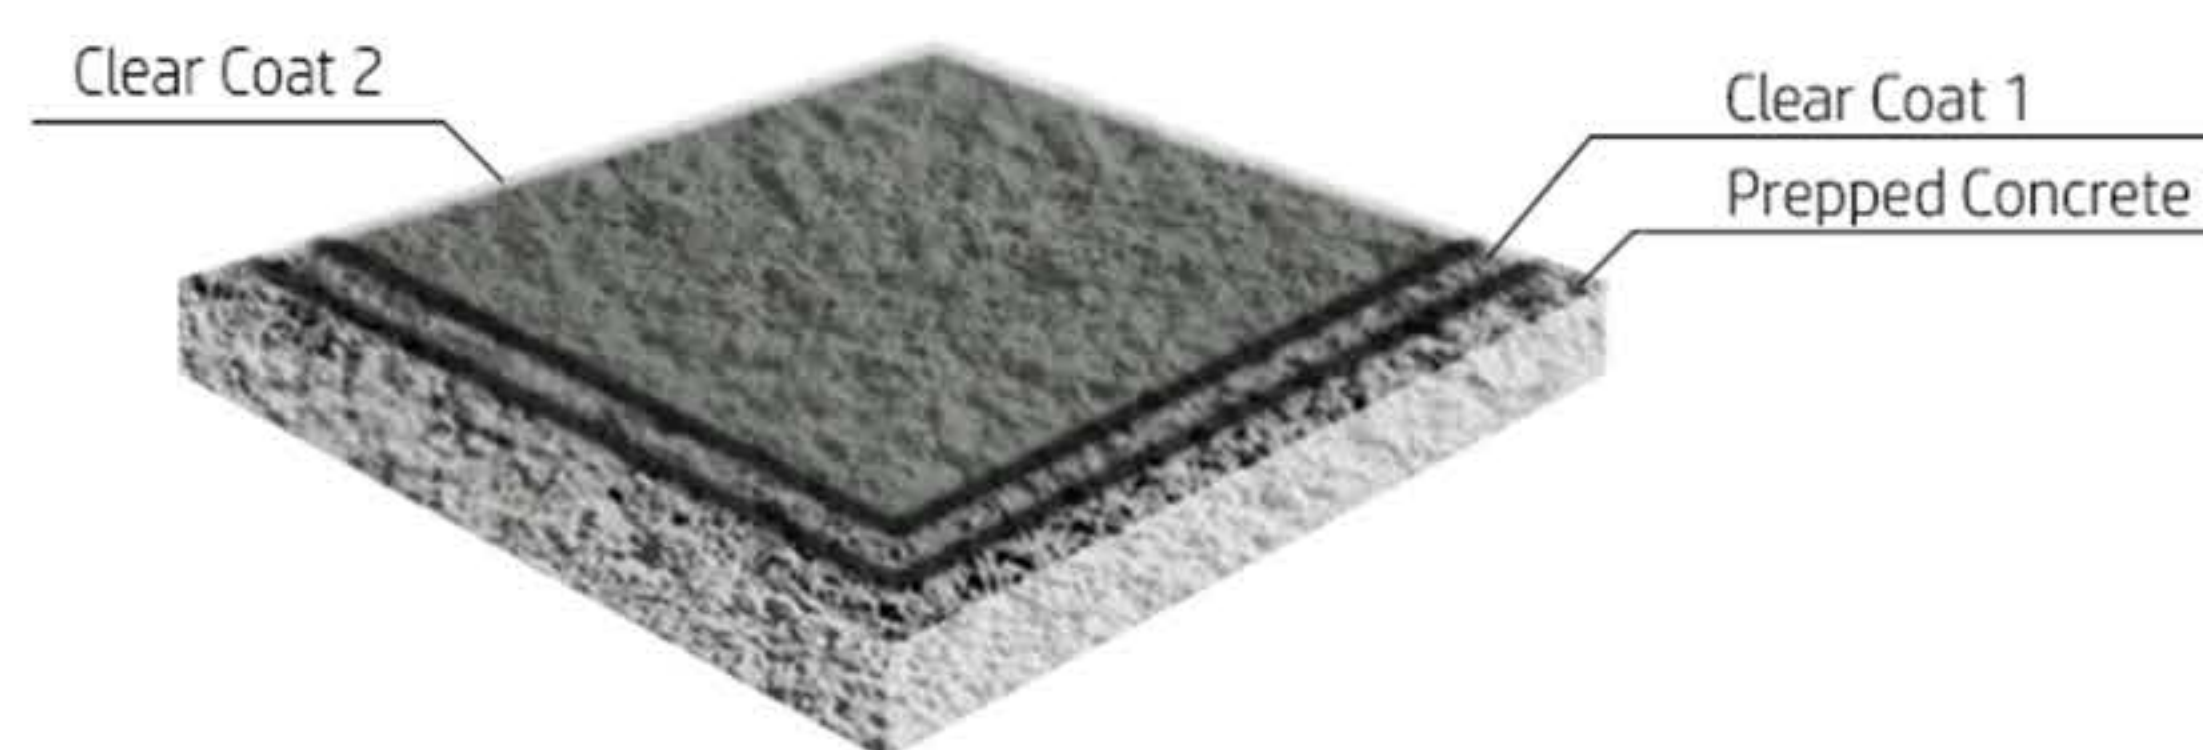

This system is a high build system that self-levels on the floor creating a smooth, durable floor finish. The solid color seamless floor from Integrated Floor Systems provides owners and facility personal with a chemical resistant durable floor that is easy to clean.

## COLOR COATING

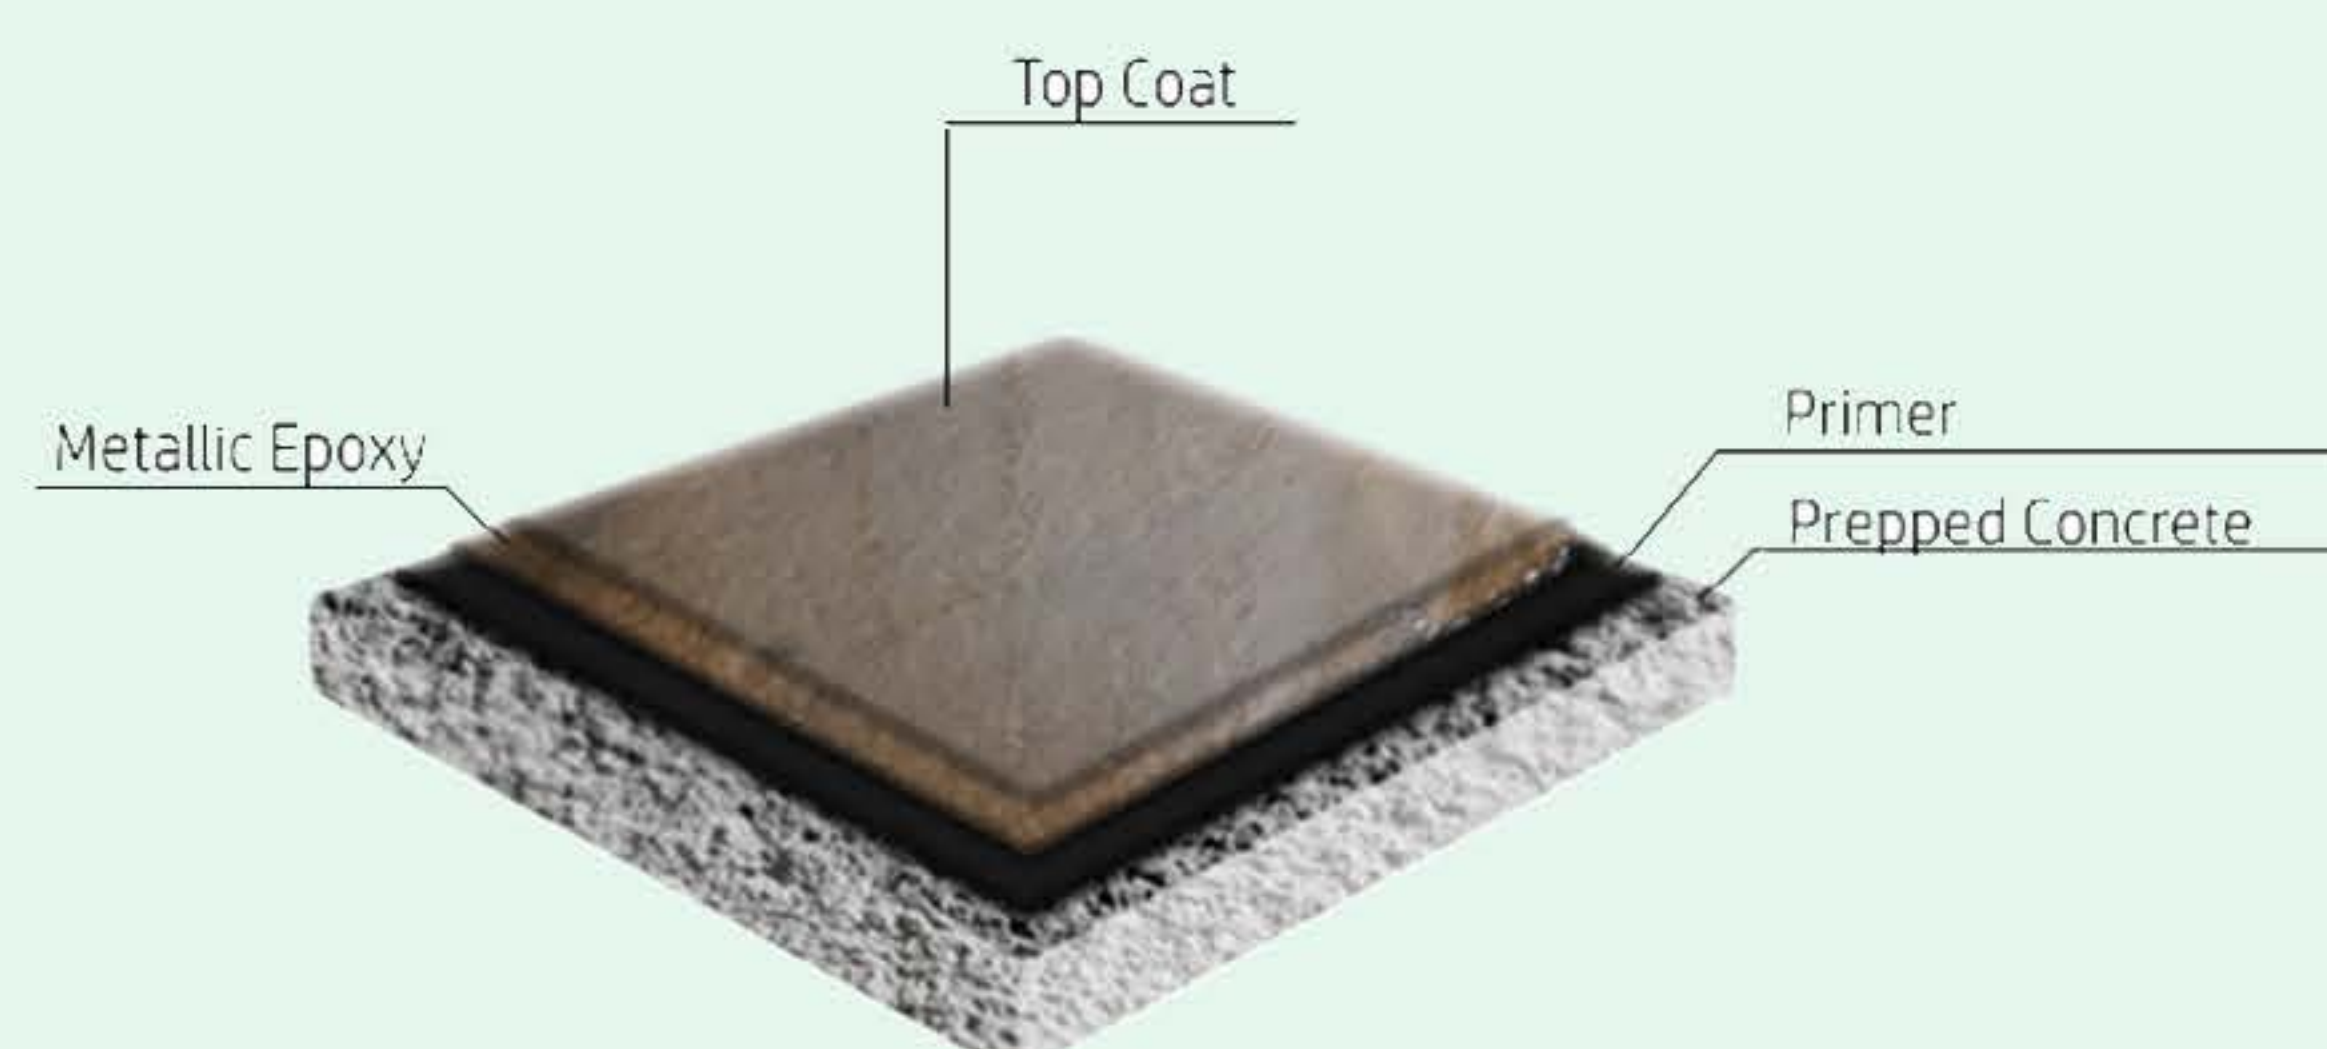

Our epoxy clear coat system provides a durable clear coat that glazes the surface and provides a durable finish while still preserving the look of the concrete floor itself.

## CLEAR COATING

This flooring system uses a metallic pigment mixed in an epoxy binder to create very unique 3 dimensional flooring effects. Our metallic epoxy system combines aesthetics and durability as well as being budget friendly.

## METALLIC COATING
